## Schuette Opens Investigation into Opioid Manufacturers and Distributors

Contact: Andrea Bitely, Megan Hawthorne; (517) 373-8060

September 19, 2017

**LANSING** – Michigan Attorney General Bill Schuette today announced that he is moving forward with an investigation of both the manufacturers and the distributors of prescription opioid drugs alongside a bipartisan coalition of 41 state attorneys general. The coalition has demanded detailed information and documents from both the manufacturers and the distributors.

Today's announcement represents a dramatic expansion and coordination of the investigations by the attorneys general into the nationwide opioid epidemic. A majority of the states' chief legal officers are now pooling resources and coordinating across party lines to address the most pressing public health crisis affecting our country, and doing so with a broad focus on multiple entities at both the manufacturer and distributor levels.

"Highly addictive opioid drugs have destroyed families, robbed children of parents and robbed parents of children," said Schuette. "I will be working with attorneys general from across the country, pooling our resources, and digging into the marketing, distribution and sale of opioids. Once the information has been provided and reviewed, we will take further coordinated legal action as appropriate."

The attorneys general are actively investigating the following pharmaceutical manufacturers and their related entities:

- Endo International plc
- Janssen Pharmaceuticals
- Teva Pharmaceutical Industries Ltd./Cephalon Inc.
- Allergan Inc.
- Purdue Pharma

The attorneys general are also seeking documents and information about distribution practices from the following medical prescription distribution companies, who together manage approximately 90 percent of the nation's opioid distribution:

- AmerisourceBergen
- Cardinal Health
- McKesson

Opioids – both prescription and illicit – are the main driver of drug overdose deaths nationwide and in Michigan. In 2015, Michigan saw its third consecutive year of increased drug overdose deaths. 1,981 people died from drug overdoses in 2015, a 13.5% increase from 2014. Since 1999, deaths from opioids have quadrupled, up from 455 in 1999.

This investigation is being handled by Schuette's Corporate Oversight Division.

## **SCHUETTE'S CONTINUED FOCUS ON STOPPING THE OPIOID CRISIS IN MICHIGAN**

It should be noted that this announcement is only the latest step in Schuette's ongoing work to address this crisis. In addition to this multistate investigation, Schuette's Licensing and Regulation Division has worked collaboratively with the Michigan Department of Licensing and Regulatory Affairs to summarily suspend the licenses of 25 prescribers since January of 2016 who engaged in overprescribing behavior. The licenses of four more dispensers were also summarily suspended during that time.

Additionally, Schuette's Health Care Fraud Division has prosecuted two separate prescription forgery rings resulting in successful resolutions against all 13 persons charged.

Schuette's newly formed Opioid Trafficking and Interdiction Unit, part of the Attorney General's Criminal Division, has already taken on 48 cases, with six individuals already convicted and 17 currently facing charges. The cases have been and will continue to be charged in cooperation with local law enforcement, Michigan State Police narcotics teams and federal agencies. The Unit will also take on felony murder cases in which it is alleged that the delivery of opioids has caused death.
